OFFICIAL CORPORATE FILING | ESTABLISHED 1993

STATUTORY IDENTIFIERS

CK Registration:	CK93/022745/23
VAT Registration:	4340140039
Accreditations:	SAQCC / SANS / FPASA
Head Office:	Germiston South, GP

CORPORATE PROFILE & TECHNICAL CAPABILITY STATEMENT

TURNKEY INDUSTRIAL GAS SUPPRESSION • EARLY WARNING SMOKE & HEAT DETECTION • 525V MCC SUBSTATION DEFENSE • COMPLIANCE CERTIFICATION

INDUSTRY TENURE
30+ Years
Unbroken industrial service across SA since 1993.

PROJECTS EXECUTED
500+
High-hazard turnkey gaseous & alarm networks.

EMERGENCY DISPATCH
24 / 7 / 365
Rapid mobile response for industrial uptime assurance.

STANDARDS ADHERENCE
100%
SANS 10139, SANS 14520, NFPA & ASIB guidelines.

1. EXECUTIVE OVERVIEW & CORPORATE MISSION

Alpha Pyrosec cc was incorporated in 1993 with a dedicated mission: to deliver fail-safe fire defense and life safety infrastructure to South Africa's critical industrial, mining, power generation, and commercial facilities. Over three decades of consistent engineering excellence, the corporation has evolved into an authoritative turnkey contractor bridging the gap between heavy plant automation and sensitive life safety electronics.

From safeguarding 525-Volt Motor Control Centers (MCCs) in heavy mineral plants to engineering clean-agent gaseous flooding systems for mission-critical server environments, our systems are calculated and installed to operate reliably when failure is not an option.

CORE MISSION STATEMENT
"To preserve industrial capital, ensure workforce life safety, and maintain uninterrupted operational continuity through uncompromising fire engineering discipline and accredited turnkey execution."

CORE VALUE ARCHITECTURE

- **Uncompromising Standards:** Strict alignment with SANS 10139 and SANS 14520 criteria.
- **Rapid Technical Mobilization:** Certified mobile crews equipped with genuine components for immediate remediation.
- **Client Partnership:** Long-term accountability, statutory logbooks, and transparent audits.
- **Turnkey Engineering:** Schematic design, hydraulic calculations, assembly, and commissioning.

2. CORPORATE & STATUTORY PARTICULARS

STATUTORY DIMENSION	OFFICIAL RECORD	REGULATORY VERIFICATION
Registered Legal Entity	Alpha Pyrosec cc	Close Corporation (SA Company Laws)
Registration Number	CK93/022745/23	Incorporated 1993 (Over 30 Years Active)
VAT Identification Number	4340140039	SARS Registered Operational Enterprise
Physical Head Office & Works	18 Kinross Street, Germiston South, 1411	Gauteng, Republic of South Africa
Postal Address	P.O. Box 4446, Germiston South, 1411	Gauteng, Republic of South Africa
Direct Telephone Switchboard	+27 (0)11 873-7593	Weekdays 08h00 - 17h00 | 24/7 Field Support
Corporate Inboxes	belinda@alphappyro.co.za rudie@alphapyro.co.za	Executive & Technical Management

3. ACCREDITED FIELD ENGINEERING & TECHNICAL WORKFORCE

Our full-time technical crew holds active SAQCC-Fire certifications, hazardous location training, and confined-space training, for heavy industrial environments.

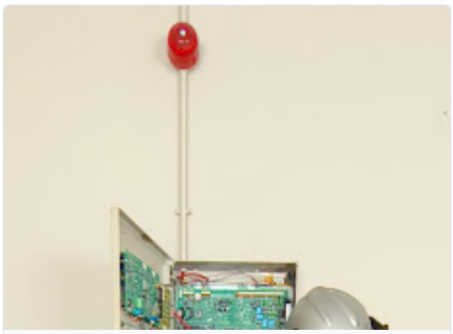

HEAVY INDUSTRY ON-SITE

Technical Crew

Qualified technicians Curtbeth, Meshack, Aifheli & Petrus,field specialists

SAQCC-REGISTERED CREW

TECHNICAL CALIBRATION

Field Diagnostics & Loops

Precision addressable loop calibration, panel battery load testing, and detector head sensitivity checks.

DIAGNOSTIC RIGOR

SUPPRESSION STORAGE

Cylinder Manifold Assembly

Pyroshield & clean-agent multi-cylinder high-pressure banks with pneumatic actuators and release valves.

PRESSURE RATED MANIFOLDS

4. TECHNICAL SPECIFICATIONS & REGULATORY STANDARDS

All engineering designs, installation methodologies, hydraulic calculations, and maintenance intervals are governed by strict South African and international fire codes, guaranteeing approval by municipal fire services and insurance underwriters:

SANS 10139 Standard

FIRE DETECTION & ALARMS

Installation and servicing of fire detection systems for commercial and heavy industrial assets. Defines detector spacing, loop redundancy, sounder dBA levels, and battery calculations.

SANS 14520 / ISO 14520

GASEOUS EXTINGUISHING SYSTEMS

Mandates gas suppression design, synthetic clean agent concentration, cylinder manifold hydraulic distribution, safety hold times, and room integrity door-fan test protocols.

ASIB & NFPA Compliance

INTERNATIONAL UNDERWRITING

Full alignment with Automatic Sprinkler Inspection Bureau (ASIB) 11th Edition rules and NFPA 72 / 2001 standards to meet international insurance underwriting requisites.

5. TURNKEY FIRE PROTECTION ENGINEERING DISCIPLINES

Gaseous Fire Suppression Systems

Turnkey design, hydraulic flow modeling, and commissioning of clean-agent and inert extinguishing systems (SANS 14520):

- Pyroshield, Inergen & IG-541 high-pressure systems (200 / 300 bar).
- FM-200 (HFC-227ea) and Novec 1230 synthetic clean agents.
- CO2 high-pressure localized and total flooding systems.
- Certified Retrotec Trained room integrity door-fan enclosure testing.

Early Warning Fire & Smoke Detection

Intelligent optical, thermal, and flame detection compliant with SANS 10139 and NFPA 72 codes:

- Addressable intelligent loop networks with remote plant telemetry.
- Aspirating Smoke Detection (VESDA, FAAST, Stratos) high-sensitivity.
- Linear Heat Detection cables for conveyor lines and cable tunnels.
- Intrinsically Safe (IS) barriers for ATEX Zone 0/1 hazardous zones.

Substation & 525V MCC Protection

Engineered protection for high & medium-voltage electrical control rooms and switchgear:

- Electrically non-conductive gaseous clean agents preventing flashovers.
- Interlocked automatic HVAC damper trip linkages and power cutoffs.
- Pre-discharge strobe sirens and acoustic evacuation sounders.
- Corrosive gas and dust-resistant industrial component enclosures.

Control Panels & Annunciator Mimics

Centralized extinguishing controllers and geographic status indicators:

- Multi-hazard extinguishing control panels (Kentec, Ziton, C-Tec).
- Custom architectural graphic LED mimic annunciators for instant zoning.
- SCADA & BMS output integration via Modbus and dry relay contacts.
- Monitored 24V standby power supplies and backup battery packs.

Genuine Accredited Equipment Staged for Commissioning

Pictured above: C-Tec multi-zone extinguishant release modules, Xtralis VESDA aspirating laser detectors, optical smoke sensors, manual break-glass units, and siren beacons tested prior to on-site installation.

6. TARGET INDUSTRIAL SECTORS & ASSET PROTECTION

Mining & Minerals
Flotation circuits, 525V MCCs, conveyor tunnels, and sub-surface switchgear.

Energy & Power
Step-down transformer rooms, HV switchrooms, cable galleries, and generator bays.

Data & Telecoms
Tier III/IV data halls, UPS battery rooms, server vaults, and clean telecom hubs.

Manufacturing
Chemical dosing facilities, automated logistics, solvent stores, and paint plants.

7. THE FIREGUARD PRO CLIENT PORTAL

REAL-TIME CLIENT COMMAND CENTRE

Redefining Transparency in Fire & Safety Management

In an industry where compliance is critical and response times save lives, waiting for end-of-month paperwork is no longer acceptable. We've built the Client Portal—a cutting-edge, real-time command centre that puts our clients directly in the driver's seat of their facility's safety ecosystem.

Designed with an obsession for user experience and radical transparency, our client Portal transforms static compliance data into a living, breathing, interactive dashboard. It's not just a reporting tool; it's peace of mind, delivered instantly.

Radical, Zero-Friction Transparency
Gone are the days of clients wondering about the status of their fire panels or extinguishers. The Client Portal bridges the gap between the field and the facility manager, offering crystal-clear, real-time visibility into every single asset on their premises. What our technicians see, the client sees.

Bulletproof Compliance Tracking
With our proactive compliance engine, clients are never caught off guard. The dashboard instantly aggregates the health of their entire site, highlighting exactly what is up to date and flagging assets that require immediate attention.

Frictionless Communication & Resolution
When a fault is identified, time is of the essence. We've eliminated the friction of phone calls and emails. With a single click, clients can seamlessly log faults or request repair quotes directly from the dashboard, instantly routing critical requests to our dispatch team.

CORE PLATFORM CAPABILITIES

1. The Dynamic Asset Register
A meticulously organized, interactive inventory of every safety asset on site.

- **Precision Filtering:** Clients can instantly toggle their view between complex Detection Systems and individual Emergency Equipment with lightning-fast, seamless filtering.
- **Lifecycle Visibility:** Clear status indicators instantly differentiate active assets from intentionally disabled ones, ensuring a perfect audit trail and total operational clarity.

2. Proactive "Major Findings" Engine
Issues no longer hide in the fine print of a PDF report.

- **Front-and-Centre Triage:** Critical faults and Major Findings are elevated directly to the client's home screen the moment they are logged by a technician.
- **Contextual Intelligence:** Clients can filter findings by equipment type, view exact locations, read direct technician notes, and see required repairs at a single glance.

3. At-a-Glance Executive Overview
Built for busy facility managers, the Overview dashboard distils thousands of data points into beautiful, actionable metrics.

- **Live counts:** Live counts of Total Assets.
- **Compliance Status:** Instant visual indicators (Green for clear, Amber for pending).
- **Prioritized Feed:** Top 5 most urgent systems requiring service right now.

8. EXECUTIVE SIGN-OFF & CORPORATE CERTIFICATION

*"We hereby certify that the capabilities, statutory credentials, and technical specifications outlined in this document accurately represent the accredited operational capacity of **Alpha Pyrosec cc**. All turnkey contracts are delivered strictly within South African National Standards (SANS 10139 / SANS 14520) and occupational health and safety regulations."*
